Profile

I am an aspiring Fullstack Developer and Graphic Designer, currently a student eager to grow my skills and gain hands-on experience. I have practical exposure to Next.js, TailwindCSS, Firebase, and Laravel paired with React via Inertia.js (SQL), and I enjoy combining technical development with design to create clean, functional, and user-friendly digital experiences.

I am passionate about learning and continuously improving—quick to adapt, teachable, and committed to contributing meaningfully in any work environment. I explore generative and vibe-based AI tools, handle tasks ranging from front-end development to basic data management, and I am currently expanding my skillset by learning WordPress.

Driven by curiosity and a strong work ethic, I aim to further develop both as a web developer and a graphic designer while contributing to projects that challenge and inspire me.

Relevant Experience

Yearbook Designer • **Business** 2017 — 2026

- Designed and produced school yearbooks using InDesign and Photoshop (2017-2019)
- Transitioned to Canva for yearbook creation, adapting to modern design tools (2020-2026)
- Delivered visually appealing and well-organized yearbooks for a diverse student body

Freelance Web Master • **AGGTE WPC Cladding & Decking** 2022 — 2025

Freelance Web Developer 2021 — 2022

- Developed and launched a construction landing page website for a company selling WPC products
- Responsible for ongoing maintenance and updates to ensure optimal website performance
- Supported the company's online presence by keeping the site current and fully functional

School Organizations & Affiliations

Head Editor • **PitikHenyo, Sangguniang Mag-aaral's Multimedia Team** 2025 — 2026

Editor 2023 — 2025

- Managed and reviewed media content for publication to ensure clarity, consistency, and quality
- Collaborated with writers, photographers, and student council officers to deliver visual and written materials aligned with organizational objectives

Club Lead/Founder • **AWS Cloud Club BTECH** 2025 — 2026

- Established the college's first cloud-technology community to promote AWS ecosystem awareness and hands-on learning
